HIGHLIGHTED PRESENTERS

Alicia Arellano, MS, CCC-SLP, has been working in schools for 18 years. She has more than 15 years of experience in working with preschool children and staff. She currently works for Chandler Unified School District as a preschool facilitator and oversees the speech department for the district.

Hanna Bogen Novak, MS, CCC-SLP, is a speech-language pathologist and social-cognitive specialist based in Los Angeles, California. With a professional lens of interpersonal neurobiology, she has a primary focus on pediatric therapies that support self-regulation, social communication, executive functioning and speech and language services at The Center for Connection and through her private practice. Ms. Novak consults and collaborates with schools, therapy teams, parent groups and professionals across the United States to support greater understanding of her areas of expertise. Additionally, she is the co-creator of The Brain Talk Curriculum: www.braintalktherapy.com.

Meredith Poore Harold, PhD, CCC-SLP, is a scientist and clinician. She is founder and owner of The Informed SLP, a website dedicated to connecting clinicians and scientists with each other’s work.

Ianessa Humbert, PhD, CCC-SLP, is an associate professor at the University of Iowa in the Department of Communication Sciences and Disorders. She has expertise in swallowing and swallowing disorders. Dr. Humbert’s research program is focused on the physiological mechanisms of swallowing disorders and the development of rehabilitation strategies for dysfunction. Her interests center on the peripheral and central control of swallowing in normal and impaired function. More recently, a major interest of her research program has been to understand the neural mechanisms underlying normal and disordered swallowing and how principles of motor learning can be applied to examine these as well as swallowing interventions. In this context, Dr. Humbert’s research involves neural stimulation, neural imaging and peripheral perturbation studies of swallowing in humans. These studies focus on aspects of age-related decline and neurogenic dysphagia and how rehabilitation can be more effective when implementing skill learning and/or adaptation to perturbations. Dr. Humbert’s research has been steadily supported by grants from the National Institutes of Health, The American Heart Association and The American Speech-Language-Hearing Association since 2006. Dr. Humbert is a widely sought-after invited speaker at several regional, national and international clinical and scientific meetings. Dr. Humbert has created online courses for continuing education credit on swallowing physiology and clinical practice, for which thousands of clinicians have registered to date, including the Swallowing Training and Education Portal (STEP) stepcommunity.com. She is the author of the Swallowing Pocket Guide: A Quick Reference for Muscles and Innervation, which has sold thousands of copies nationally and internationally.

Erik X. Raj, PhD, CCC-SLP, holds a certificate of clinical competence from the American Speech-Language-Hearing Association and is a practicing speech-language pathologist who works with school-age children and adolescents with various communication difficulties. He is currently an assistant professor and clinical supervisor in the Department of Speech-Language Pathology at Monmouth University in West Long Branch, New Jersey, and is also a facilitator at Camp Shout Out, a Michigan-based sleep away summer camp for young people who stutter. Dr. Raj regularly presents interactive workshops demonstrating how speech-language pathologists can use mobile and internet-based technologies to educate and motivate school-age children and adolescents. In addition to developing more than 25 mobile apps for children with communication difficulties, he is the creator of Your Face Innervation, which has sold thousands of copies nationally and internationally.

Brian Taylor, AuD, is currently the director of scientific and product marketing for Signia. He also serves as editor-at-large for Hearing Health and Technology Matters, a leading professional blog, and editor of Audiology Practices, the quarterly publication of the Academy of Doctors of Audiology. Dr. Taylor has authored numerous peer reviewed articles and books on topics ranging from hearing aids to practice management. With more than 25 years of clinical, business management and teaching experience, he is a highly sought lecturer at national and international events. His latest textbook, Audiology Practice Management was published in 2019.
